PROFILE

Full-Stack Developer specializing in scalable web applications with JavaScript, cloud infrastructure, and AI integration. Passionate about shipping fast, production-ready code that transforms complex challenges into elegant business solutions.

EXPERIENCE

Full Stack Lead Developer   July 2025 - Present
Kakiyo OÜ

- **Built AI-powered LinkedIn automation platform** with Next.js/React, improving client outreach engagement by 70%
- **Reduced Appwrite costs by 70%** through query optimization and caching, maintaining sub-100ms API response times
- **Shipped production features rapidly** with 99.9% uptime, iterating based on real-time user feedback

SKILLS

Languages and Frontend: JavaScript, TypeScript, C++, Java, React.js, Next.js, Tailwind CSS, Framer Motion
Backend, Databases and Auth: Node.js, Express.js, Firebase, Appwrite**,** Prisma, MongoDB, Firebase Realtime DB, PostgreSQL, Better-Auth.

PROJECTS

AVChat (Live Demo | Github)   July 2025
Multi Model LLM Chat App (Realtime)

- Developed **multi-model AI chat** supporting 20+ LLMs (GPT, Claude, Gemini) with **real-time sync** and **global memory** using **Next.js**, **Tailwind CSS**, **Zustand**
- Implemented **text-to-image** and **image-to-image generation** with 2x faster response times than traditional LLM platforms
- Built robust backend with **Appwrite Auth**, **Framer Motion** animations, and **WebSocket** for real-time updates
- **Fully open-source** with modular architecture and comprehensive docs.

Effisense (Live Demo | Github)   March 2025
Calendar and Task Management

- Developed **AI-powered calendar and task management app** with smart scheduling suggestions using **React.js**, **Tailwind CSS**, **Framer Motion**
- Integrated **real-time notifications** and synchronization with **Appwrite** backend and **Google Calendar Sync**.
- Implemented productivity features including task prioritization, deadline tracking, and automated scheduling

SkillCompass (Live Demo | Github)   April 2025
AI-Powered Career Guidance and Resource Platform

- Designed and built an **AI-based system** to provide career **suggestions** and curated learning resources.
- Leveraged **Gemini API** and **Groq API** to generate personalized career paths.
- Full-stack development using **React.js, Firebase, Tailwind CSS, and Appwrite**.

EDUCATION

Manipal University Jaipur   *Jaipur, India*
Bachelor of Engineering in Computer Science(IOT & IS)   2023 – 2027
